This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previously Presented) A breast prosthesis and bust cup system adapted to be worn by a wearer comprising:

a breast prosthesis having a front surface and a rear surface, said rear surface being positionable adjacent to a wearer's body;

front hook material positioned on said front surface; rear hook material positioned on said rear surface;

a bust cup including loop material engagable with said hook material, wherein said breast prosthesis is receivable in said bust cup; and

a comfort pad attached to said rear surface through said rear hook material.

2. (Previously Presented) The breast prosthesis and bust cup system of claim 1 wherein said hook material comprises two strips of hook material positioned along a periphery of the breast prosthesis.

3. (Previously Presented) The breast prosthesis and bust cup system of claim 2 wherein each of said strips has a length greater than its width.

Application No.
Amendment Dated: August 18, 2005
Reply to Office Action of:

4. (Previously Presented) The breast prosthesis and bust cup system of claim 2 wherein said loop material comprises two strips of l00p material positioned a long a periphery of the bust cup.

5. (Previously Presented) The breast prosthesis and bust cup system of claim 4 wherein each of said strips has a length greater than its width.

6. (Canceled)

7. (Previously Presented) The breast prosthesis and bust cup system of claim 1 wherein said rear hook material comprises two strips of hook material positioned along a periphery of the breast prosthesis.

8. (Previously Presented) The breast prosthesis and bust cup system of claim 7 wherein each of said strips of rear hook material has a length greater than its width.

9. (Canceled)

10. (Previously Presented) A breast prosthesis adapted for use by a wearer comprising:

Application No. .
Amendment Dated: August 18, 2005
Reply to Office Action of:

a front surface and a rear surface, said rear surface being positionable adjacent to a wearer's body;

hook material positioned on said front surface;

rear hook material positioned on said rear surface; and

a comfort pad removably attached to said rear surface through said rear hook material.

11. (Previously Presented) The breast prosthesis of claim 10 wherein said hook material comprises two strips of hook material positioned along a periphery of the breast prosthesis.

12. (Previously Presented) The breast prosthesis of claim 11 wherein each of said strips has a length greater than its width.

13. (Previously Presented) The breast prosthesis of claim 10 wherein said rear hook material comprises two strips of hook material positioned along a periphery of the breast prosthesis.

14. (Previously Presented) The breast prosthesis of claim 13 wherein each of said strips of rear hook material has a length greater than its width.

Application No. .
Amendment Dated: August 18, 2005
Reply to Office Action of:

15. (Previously Presented) The breast prosthesis and bust cup system of claim 1, wherein said rear surface of said breast prosthesis has a substantially triangular shape with rounded corners.

16. (Currently Amended) The breast prosthesis and ~~bust cup system~~ of claim 10, wherein said rear surface has a substantially triangular shape with rounded corners.

17. (Previously Presented) The breast prosthesis and bust cup system of claim 1, wherein said comfort pad has a substantially triangular shape with rounded corners.

18. (Currently Amended) The breast prosthesis and ~~bust cup system~~ of claim 10, wherein said comfort pad has a substantially triangular shape with rounded corners.

19. (Currently Amended) A breast prosthesis adapted for use by a wearer comprising:

a prosthesis having front surface and a rear surface, said rear surface being positionable adjacent to a wearer's body and having a first shape;

Application No. .
Amendment Dated: August 18, 2005
Reply to Office Action of:

a comfort pad having a second shape generally congruent to said first shape, wherein said first and second shapes are generally triangular with rounded corners; and

hook and loop means for removably attaching said comfort pad to said rear surface.

20. (Previously Presented) The breast prosthesis of claim 15 wherein said hook and loop means comprise two strips of hook material positioned along a periphery of the breast prosthesis.

21. (Previously Presented) The breast prosthesis of claim 20 wherein each of said strips has a length greater than its width.

22. (Canceled)
